Subtle structure

APPLICATION

Website: light pages, ink typography, slate buttons and links.

Brand materials: ink on light backgrounds; white on slate or ink.

Use slate sparingly. Keep large content areas neutral and uncluttered.

The approved BWK letter shapes and spacing are preserved.

Website colour system

Light is the default. Use dark sections selectively for emphasis.

Role	Light	Dark
Background	#F6F7F5	#172129
Body text	#172129	#FFFFFF
Card surface	#FFFFFF	#25333C
Secondary text	#5F6D74	#C0CDD4
Primary button	#416377	#416377
Button text	#FFFFFF	#FFFFFF
Button hover	#2F4D61	#2F4D61
Links / focus	#34566D	#BCD6E8
Input border	#7C8495	#C0CDD4
Divider	#D8E0E1	#677F8E

STATUS COLOURS

Success	#166534	#86EFAC
Warning	#92400E	#FCD34D
Error	#B42318	#FDA29B

TEXT CONTRAST CHECKS

Light body text: 15.20:1. Secondary text on light pages: 4.98:1.

White on slate buttons: 6.41:1. Hover button text: 8.92:1.

Light links: 7.24:1. Dark links: 10.83:1.

HANDOFF

CSS and JSON include both themes and status foreground/background pairs.

Use data-bwk-theme="dark" or .bwk-dark-section for a dark section.

Use SVG for scalable artwork; transparent PNG for graphics and video.

Pair status colours with labels. Keep logo proportions and clear space.

Screen HEX values are the master. Match print colours with the printer profile.
