

Logo system

Final master: the approved first BWK refinement.

PRIMARY / BLACK ON LIGHT OR WHITE ON DARK

COLOUR

THE IDEA

Connected initials suggest modular digital systems; the diagonals express motion.
The same approved outlines are used in every exported version.

Using the logo

Choose the right file and keep the artwork proportional.

CLEAR SPACE

Leave at least one monogram stroke width clear on every side.

RECOMMENDED STARTING SIZES

Version	Digital width	Print width
Primary horizontal	320 px	55 mm
Stacked	220 px	38 mm
Monogram	100 px	18 mm
Wordmark	180 px	32 mm

Check readability in the final placement; use icon files for favicon-sized spaces.

FILE FORMATS

SVG	Outlined masters for websites, Figma, and scalable artwork.
PDF / EPS	Vector print artwork. Black print versions use 100% K.
PNG	Transparent backgrounds. Black for light; white for dark.
JPG	Solid-background versions for easy sharing.
ICO / icon PNG	Ready-sized browser, app-shortcut, and profile artwork.

HANDOFF

Use 01-Vector-SVG as the scalable master collection.

Use 03-Transparent-PNG for graphics and 05-Social-Profile for avatars.

Use 06-Web-App-Icons for web files; README explains each folder.

CONSISTENCY

Keep the proportions, spacing, and letter shapes intact.

All brand lettering is outlined; no font installation is required.
